Adjusting Your Bandwidth

Before adjusting your upload bandwidth, you should perform a test to determine your actual upload bandwidth speed. From your home computer, go to: <http://speed.acndigital.net/network-check.html>

- To adjust 256K bandwidth setting on your video phone:
- Press MENU and select Settings, System Settings then Display.
- From Display menu, scroll down to Upload Bandwidth. Choose from 128, 256, 384 or 512kbps.
- Select Frame Rate and adjust your frame rate to Low, Normal or High to optimize your video picture.
- Press BACK to save changes.
